

Dear

I am writing to you as a member of the community asking for your consideration in investing in a local pet friendly park.

After extensive research, I have noticed that we have limited access to outdoor pet-friendly spaces here in

Having a local pet friendly park, especially in a populated area such as ours, will be beneficial for both pet and non-pet owners and for the animals themselves, especially dogs.

For dog owners, facilities like these offer a great chance to exercise, contribute to their own health and well-being, bond with their animal and meet other dog owners.

For non-dog owners, allowing dogs the freedom of unrestrained exercise can help them release bottled up energy and alleviate many public nuisances associated with lack of activity like digging, chewing and barking.

A beautiful public space for both people and pets can also have the power to instill civic pride and enhance the quality of life of our community.

There is strong evidence of a causal relationship between pet ownership and better health, with dogs and their owners inclined to exercise more, sleep better and feel fitter. The introduction of a pet friendly park to our local area will help improve cardiovascular health, reduce boredom and stimulate minds, while providing opportunities for community members to interact and socialise.

Below are a few key features required in the installation of a pet friendly park:

- Clear signage about rules and expectations for the use of the park
- Double gate system to keep pets safe as they go in and out of the park off-leash
- Hydration station(s) for dogs
- Waste station so owners can pick up after dogs
- Shade for both dogs and owners
- Fencing around the park

Thank you for taking the above into consideration. I look forward to receiving your response.

Should you have any questions or would like to discuss the matter further, please do not hesitate to contact me directly.

Kind Regards,
